OUR MISSION

Our mission at iConnect is to become a market leader that consistently exceeds our customer's expectations by providing them with comprehensive IT services and support with the overall goal to improve IT efficiency and business profitability. Our goal is to provide innovative and cutting-edge solutions today for tomorrow's technologies coupled with the best customer service in the industry.

CORE CAPABILITIES

Software Development/Mobile Apps: Leveraging over two decades of experience, we are experts at delivering custom software solutions and commercial off-the-shelf (COTS) products. Design, develop, and deploy software solutions based on an agency's specific requirement. We evaluate your program needs and develop and program software. Whether simple or complex we have the capability.

Artificial Intelligence: Machine & Deep Learning methods used to create regression analysis, propagation, predictive analytics.

Cybersecurity: Risk, Security, & Compliance: Strategic, analytical, and technical risk management and cybersecurity services in the areas of Security & Privacy Program Management and Governance; Security & Privacy Assessment and Testing; and Security Engineering & Operations

Program Management: PMI-certified professionals offer program and project management services. – Program/Project Initiation, Planning, Execution, Monitoring and Controlling, and Closing.

Information Assurance: The iConnect team has years of experience and is a leading provider of Information Assurance (IA), Certification & Accreditation (C&A), risk management, security architecture.

Cloud Services: iConnect manages and deploys enterprise cloud computing solutions. From deploying turnkey cloud technology to designing integrated hybrid platforms, Infrastructure as a Service (IaaS) and Software as a Service (SaaS) is the core cloud offerings. Our solutions address the issues dealing with the complexities, investment, and support of the IT infrastructure.

PAST PERFORMANCE

Ashley & Trivetts Furniture, VA   Prime - Cybersecurity Analysis
Complete overhaul of existing network infrastructure to be able to respond to cybersecurity threats, intrusion prevention and network security. Conducted analysis to determine extent of concerns and proposed strategies for combating the issues at hand and attacks. Designed complete network topology, planned the architecture and programmed the software to identify threats in real time and have the ability to handle in real time.

BPEC Enterprises, TX Prime – Cloud Solutions
Evaluated company requirements, assessed risks, vulnerabilities and software to design a customized system that could read/write into/from the Cloud. Created company specific software, recommended changes to policy and procedures and administered development of a Cloud solution web application to handle live billing, coding, tracking and reporting of issues and training to company personnel. Created a cloud solution using AWS and a backup solution using Azure.

Deloitte Subcontract - Intra-Agency IT Integration
Evaluated existing IT systems as-is and provided a detailed report on the features and weaknesses currently versus what we need to do upgrade and move up on the value chain vis-à-vis a modern-day architecture with web application software development and mobile applications development. Upon selection of the features and designs by the company, we wrote the code, created the program, set up the servers and database (cloud + on premise), created the mobile applications and have it installed on every iOS and Android devices as necessary to align individual login requirements. Created the programs using Microsoft Dot Net, JS, SqlServer, Swift and Java on Windows Server 2012

Accenture Subcontract - IT Management
Functioned as subcontractor for management of all IT related work. Objective was to Protects Privacy and Business Sensitive Information and Implement the Best Security Practices Based on a Risk and Cost/Benefit Approach. Created an understanding of information security and privacy policies and created the security awareness for basic understanding of how to respond to risk. Provided security role based training to carry out IA risk management roles at the program level. Helped customer to understand how to do monitoring compliance and providing guidance on the implementation of IA policies. Provided security and privacy training and help with Investigating system security and privacy incidents.
